

WORK EXPERIENCE

Machine Learning Engineer

September 2024 – Present

Prompt Inversion AI, Dover, Delaware

- Scaled an LLM-driven FastAPI backend with async design for job sourcing and email campaigns, cutting response time by **60%**.
- Developed an AI-powered resume matching algorithm using RAG based vector-search, improving placement accuracy by **40%**.
- Built and deployed Next.js web app on AWS Amplify for AI-driven job placement with authentication and real-time analytics.
- Set up AWS CI/CD pipeline (CodePipeline, ECR, EC2) for zero-downtime containerized deployments with **95%** test coverage.
- Assessed six major AI agentic frameworks on message passing, tool calling, human-in-the-loop integration and debuggability.
- Built unified Python framework for red teaming LLMs, implementing jailbreak algorithms to test AI safety and model alignment.

Analytical Scientist Intern

June 2023 – December 2023

FICO, San Diego, California

- Built end-to-end monitoring system to detect model drift in a fraud-detection neural net using self-devised time-series algorithm.
- Validated the system for **15** key clients, triggering alerts for significant shifts in distribution and reduced false positives by **90%**.
- Developed an ETL pipeline to compute and visualize the distribution of terabyte-scale datasets, cutting processing time by **50%**.
- Ran statistical experiments to simulate and cluster drastic shifts in customer behavior patterns and sophisticated fraud schemes.

AI Engineer

February 2022 – August 2022

CollabLens, Haryana, India

- Developed and deployed multiple **AI stations** for automated drop testing of flour packets. Integrated hardware with **cloud-based** modules for spillage detection, orientation checks and real-time analytics, leveraging GStreamer for **live video streams**.
- Secured a contract to deploy the system in **50 factories** and raised **\$200,000** in funding, with investment from MIT Media Lab.
- Prototyped a versatile **Computer Vision System** for real-time defect detection in laser-engraved products, enabling automated quality control on the factory's assembly lines. Achieved **95%** accuracy and a mean inference time of **2.5 seconds per board**.

Machine Learning Intern

May 2021 – December 2021

Hypertechpreneurs, Haryana, India

- Productionized a Vehicle Damage Detection Model utilizing **Mask R-CNN** for Instance Segmentation to automate inspections.
- Integrated model inference endpoints in web and mobile applications and developed a robust OCR system with **92%** accuracy.

EDUCATION

University of California San Diego

2022 – 2024

Master of Science, Data Science

GPA (3.98/4.0)

Teaching Assistant for DSC-261: Data Ethics, DSC-291: Statistical Models, DSE-250: Relational Data Models

Courses: *Linear Algebra, Causal Inference, Visual Learning, Search and Optimization, Scalable Systems, Data Management*

Delhi Technological University, New Delhi

2018 – 2022

Bachelor of Technology, Mathematics and Computing Engineering

CGPA (8.73/10)

PROJECTS

[FRIES IN THE BAG AI](#)

January 2025 – Present

- Building full-stack AI-powered automated job application co-pilot using **DeepSeek-V3** to streamline the application process.

[Rubik's Cube 3D Visualizer and Deep Reinforcement Learning Solver](#)

July 2024 – September 2024

- Developed NxN Rubik's Cube 3D visualizer and implemented Monte Carlo Tree Search algorithm optimized with a self-designed deep reinforcement learning ResNet. Achieved 71% solution rate for 9-move scrambles and sub-1 second solve times.

[MediLoRA: LLM for medical Q&A with QLoRA](#)

October 2023 – January 2024

- Fine-tuned OpenHermes-2.5-Mistral-7B using Q-LoRA on 300M medical text tokens, improving PubMedQA and MedQA accuracy by over **20%**. Matched state-of-the-art 70B model performance on MMLU-Medical with just **0.05%** of the data size.

RESEARCH EXPERIENCE AND PUBLICATIONS

- [Sood, S., Jain, T., Batra, N., Taneja, H.C. \(2023\). Black-Scholes Option Pricing Using Machine Learning.](#) [ICDSA 2023]
- [S. Sood and Y. Ahuja, "Selective Lossy Image Compression for Autonomous Systems."](#) [STSIVA 2021]

TECHNICAL SKILLS

- **Programming** : Python, SQL, JavaScript, C++, R, MATLAB, HTML, CSS
- **Technologies** : Pandas, NumPy, PyTorch, TensorFlow, Git, Flask, AWS, PostgreSQL, Spark, Docker, Kubernetes, Next.js
- **Skills** : Data Science, Machine Learning, Data Engineering, Computer Vision, Language Processing, Data Analytics
